

BRD Analysis - 2025-08-13

Please provide me with the PDF document! I need the content of the PDF to be able to edit it and add a new GET API for MLOps.

Once you upload the PDF, I'll do my best to incorporate the new API functionality while maintaining the existing document structure and formatting as closely as possible.

I'll also need some details about the new GET API – specifically:

- **Endpoint URL:** (e.g., `/api/mlops/models``)
- **Request Parameters:** (e.g., ``model_id``, ``status``, ``last_updated_after``)
- **Response Data:** (What data will the API return – e.g., a list of model versions, their status, last updated date, etc.)

The more information you can give me about the API, the better I can integrate it into the document.
